Profile

ICT and Business Analyst with a BSc (Hons) in Computing from the University of Greenwich and practical experience in business process analysis, CRM administration, workflow optimisation, and data reporting. Skilled in analysing organisational operations, identifying inefficiencies, and supporting the implementation of digital systems that enhance productivity and customer engagement.

Experienced in market research, stakeholder coordination, data collection, and performance monitoring across consultancy, NGO, and commercial environments. Proficient in Microsoft Excel, SQL, Python, HubSpot CRM, Google Analytics, ODK, and Mailchimp. Committed to developing advanced expertise in Business and Systems Analysis in order to design technology-enabled solutions that improve organisational performance, strengthen decision-making, and support economic and social development across South Africa and neighbouring African countries.

PROFESSIONAL EXPERIENCE

UN Online Volunteer – Digital Communications & Growth Analytics, 07/2026 – Present
National Youth Council of Malawi Remote (Africa)

Responsibilities

- Create and distribute digital content across social media platforms to increase online awareness for the National Youth Summit.
- Engage youth audiences online to boost participation and drive campaign visibility.
- Monitor campaign outreach metrics to track audience engagement and improve communication efforts.
- Coordinate with campaign committees to align digital marketing with youth development goals.

Business Analyst & Digital Systems Assistant (Independent Contractor), 03/2026 – 06/2026
CAW Industries / Dr. Willard's Water Brand Remote (USA)

Responsibilities

- Analysed operational and customer data to support organisational decision-making and business improvement.
- Implemented CRM workflows and digital process improvements that enhanced operational efficiency and customer engagement.
- Produced weekly and monthly KPI reports covering operational performance, customer activity, conversion trends, and organisational metrics.
- Monitored digital platform performance and identified opportunities for workflow optimisation and improved service delivery.
- Supported data management, reporting, and business process improvements across Shopify, Amazon, HubSpot CRM, and Mailchimp.
- Collaborated with management to support strategic planning through data analysis and performance reporting.

Key Achievement

- Contributed to a **45% month-on-month organisational performance increase** by implementing data-driven CRM optimisation, workflow automation, and business process improvements.

Field Data Enumerator / Research Assistant, UMODZI Consulting

12/2025 – 02/2026

Responsibilities
